

# Computer-Assisted Language Comparison in Practice

Summary on our blog / journal Computer-Assisted Language Comparison in Practice.

- [Submission Workflow](#)
  - [Formating the OnlyOffice version of your article](#)

# Submission Workflow

This chapter presents the major workflow of submitting a blog / study to the journal and blog Computer-Assisted Language Comparison on Practice.

# Formating the OnlyOffice version of your article

## General

This chapter introduces a handful of points that should be taken care of while preparing the OnlyOffice version of your article in CALC-IP.

## Font style

Please select the provided font styles from the OnlyOffice menu (e.g. CalcIpMain) and do not change font size, font, etc, manually.

## Code formating

Please select 'Plugins' and install the 'Highlight Code' plugin. Simply select the code block you want to format and chose the language you desire. For CALC-IP, we generally use the Googlecode style, and a gray (#d9d9d9) background.

## URL's

The font defaults remove the color of hyperlinks. You can chose the 'Dark Green' from the font color dropdown to restore this for the selected link.
